DETAILED ACTION

Response to Arguments

Applicant's arguments filed 11/6/03 have been fully considered but they are not persuasive. The specification states on page 4, last paragraph, that the detecting device can be located in any number of places as long as it performs the desired function i.e. detecting material accumulation. Therefore, whether the device is below the comminutor or above it appears to have been a design choice only. It is also noted that the dependent claims have not been separately argued such that their patentability stands or falls with the parent claims.

Claim Rejections - 35 USC § 103

Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bleasdale. See paper number 3 for this rejection. Note also that having the detector below the comminutor would have been a design choice only as noted above.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of
